**Parasol™ is designed for Australian conditions and made to stringent quality and manufacturing specifications.**

**Parasol™** is a commercial grade knitted shade cloth suitable for tension structures and other heavy duty applications. It is manufactured using a combination of high density monofilament and tape which offers a higher degree of protection from UV radiation, known to cause sunburn and skin cancers.

For ease of fabrication and improved performance, **Parasol™** shade cloth has been 'heat set' before rolling, to improve lay flat characteristics and dimensional stability.

**Nominal weight:**

9.6 oz. per square yard / 325 gsm +/- 10%

**Available in:** 9.8 feet/3.0 meters (width) x 55 yards / 50 meters (length) center folded rolls.\*

\*Unfolded (straight) rolls are available upon request and would be subject to minimum ordering quantities.

Parasol™ is available from:
