Colorfastness to Water & Solvents	Shade Change: 4 Stain: 3
Tear Strength	Fill: 30 Warp: 13
Break Strength	Fill: 259 Warp: 129
Pilling	Class 5
Cleaning Code	S – Solvent Clean Only

CLEANING INSTRUCTIONS

Clean with a dry cleaning solvent only, not water. Never over-saturate the material with the solvent as damage can occur. If it's a pile fabric, it will need to be brushed after cleaning to restore its natural appearance. When shopping for cleaning solutions, look for upholstery products labeled S fabric cleaner. In order to avoid expensive mishaps, always spot clean first. Before using the cleaner on the entire piece of furniture, clean an inconspicuous place on the fabric.
